

Atty. Docket No. YOR9-2000-0138US1
(590.010)

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. (Currently Amended) An apparatus for regulating electronic media content, said apparatus comprising:

an interface arrangement which receives media input;

a controller which attributes at least one credit value to at least one portion of received media input;

a regulator which regulates the presentation of received media input at a presentation medium based on the at least one credit value attributed to the at least one portion of received media input;

wherein said media content may constitute one or more inputted portions.

2. (Currently Amended) The apparatus according to Claim 1, wherein:

said controller attributes a positive credit value to received media input construed as credit-bearing content; and

said controller ~~is~~ attributes a negative credit value to received media input construed as debit-bearing content.

Atty. Docket No. YOR9-2000-0138US1
(590.010)

3. (Original) The apparatus according to Claim 2, wherein:

said controller is adapted to attribute a credit rating associated with said end user of the presentation medium; and

said regulator is adapted to control the presentation of received media input based on the attributed credit rating.

4. (Original) The apparatus according to Claim 3, wherein the credit rating represents a threshold value and said regulator is adapted to cease the presentation of debit-bearing content upon the threshold value being breached.

5. (Original) The apparatus according to Claim 2, wherein:

media input received at said interface arrangement bears an initial credit value; and

said controller is adapted to adjust the initial credit value of received media input based on at least one predetermined criterion for adjusting the initial credit value of received media input.

6. (Original) The apparatus according to Claim 2, wherein said controller is adapted to:

attribute a credit balance to an end user of the presentation medium;

monitor the presentation of received media input at the presentation medium; and

Atty. Docket No. YOR9-2000-0138US1
(590.010)

adjust the credit balance based on the presentation of received media input at the presentation medium.

7. **(Original)** The apparatus according to Claim 6, wherein said controller is adapted to subtract from the credit balance upon debit-bearing content being presented at the presentation medium and add to the credit balance upon credit-bearing content being presented at the presentation medium.

8. **(Original)** The apparatus according to Claim 6, wherein:

the received media input includes pre-recorded media content; and

said regulator comprises a decoder for decoding the pre-recorded media content, as to permit the presentation of the content, based on the credit balance.

9. **(Original)** The apparatus according to Claim 6, wherein said controller is further adapted to adjust the credit balance based on factors external to the received media input.

10. **(Original)** The apparatus according to Claim 1, wherein the presentation medium is a television.

11. **(Original)** The apparatus according to Claim 10, wherein the received media input includes at least one of: a television commercial and at least a portion of a television show.

Atty. Docket No. YOR9-2000-0138US1
(590.010)

12. **(Original)** The apparatus according to Claim 10, wherein said controller comprises a set-top cable TV converter box.

13. **(Original)** The apparatus according to Claim 1, wherein the presentation medium is a computer monitor.

14. **(Original)** The apparatus according to Claim 13, wherein the received media input includes internet multimedia content.

15. **(Currently Amended)** A method of regulating electronic media content, said method comprising the steps of:

receiving media input;

attributes at least one credit value to at least one portion of received media input;

and

regulating the presentation of received media input at a presentation medium based on the at least one credit value attributed to the at least one portion of received media input;

wherein said media content may constitute one or more inputted portions.

16. **(Original)** The method according to Claim 15, wherein:

said attributing step comprises:

attributing a positive credit value to received media input construed as credit-bearing content; and

Atty. Docket No. YOR9-2000-0138US1
(590.010)

attributing a negative credit value to received media input construed as
debit-bearing content.

17. **(Original)** The method according to Claim 16, further comprising the steps
of:

attributing a credit rating associated with an end user of the presentation medium;
and

said regulating step comprising the step of controlling the presentation of received
media input based on the attributed credit rating.

18. **(Original)** The method according to Claim 17, wherein the credit rating
represents a threshold value and said controlling step comprises ceasing the presentation
of debit-bearing content upon the threshold value being breached.

19. **(Original)** The method according to Claim 16, wherein media input received
at said interface arrangement bears an initial credit value and said method further
comprises the step of adjusting the initial credit value of received media input based on at
least one predetermined criterion for adjusting the initial credit value of received media
input.

20. **(Original)** The method according to Claim 16, further comprising the steps
of:

attributing a credit balance to an end user of the presentation medium;

Atty. Docket No. YOR9-2000-0138US1
(590.010)

monitoring the presentation of received media input at the presentation medium;
and

adjusting the credit balance based on the presentation of received media input at
the presentation medium.

21. **(Original)** The method according to Claim 20, further comprising the steps
of subtracting from the credit balance upon debit-bearing content being presented at the
presentation medium and adding to the credit balance upon credit-bearing content being
presented at the presentation medium.

22. **(Original)** The method according to Claim 20, wherein:

the received media input includes pre-recorded media content; and

said method further comprises the step of decoding the pre-recorded media
content, as to permit the presentation of the content, based on the credit balance.

23. **(Original)** The method according to Claim 20, further comprising the step of
adjusting the credit balance based on factors external to the received media input.

24. **(Previously Presented)** The method according to Claim 15, wherein the
presentation medium is a television.

25. **(Original)** The method according to Claim 24, wherein the received media
input includes at least one of: a television commercial and at least a portion of a
television show.

Atty. Docket No. YOR9-2000-0138US1
(590.010)

26. **(Previously Presented)** The method according to Claim 15, wherein the presentation medium is a computer monitor.

27. **(Original)** The method according to Claim 26, wherein the received media input includes internet multimedia content.

28. **(Currently Amended)** A program storage device readable by machine, tangibly embodying a program of instructions executable by the machine to perform method steps for regulating electronic media content, said method comprising the steps of:

receiving media input;

attributes at least one credit value to at least one portion of received media input;

and

regulating the presentation of received media input at a presentation medium based on the at least one credit value attributed to the at least one portion of received media input;

wherein said media content may constitute one or more inputted portions.
